Education

Ukrainian Engineering - Pedagogics Academy 2009 - 2014

Specialist degree in Computer Technologies

Languages

- English - Intermediate
- Ukrainian - Native

Certifications

- "QA Automation Python"-Hillel IT School;
- "The Fundamentals of Software Testing" - QA Test Lab Training Center;
- "QA Engineer Course" – V. Ksendzov;
- "Software testing (Web & Mobile)" - Galera IT Academy;

Summary

Manual QA Engineer with 2+ years of experience testing web and mobile applications for iOS & Android. Successfully worked in an Agile team using Scrum/Kanban and participated in full development life cycles.
Not afraid to ask questions and speak up with improvements and ideas.
Can say "No" to release if the product is not ready, and do everything to reach the deadlines.

Skills

- *Test Theory:* Classification of test types, Test design techniques, Functional, Regression, Smoke, Mobile testing;
- *Jira, Zephyr, TestRail, Confluence:* Created user stories, checklists, bug reports;
- *Chrome DevTools:* Inspected elements, console logs, cookies, cache, responsive design, HTTP requests/responses;
- *Postman (GraphQL & REST):* Sent Queries, Mutations, HTTP requests (GET, POST, PUT, DELETE), used variables, wrote tests;
- *SQL (PostgreSQL):* Wrote queries with SELECT, INSERT, UPDATE, JOIN, GROUP BY, ORDER BY, WHERE;
- *Charles Proxy, Fiddler:* Intercepted traffic, throttling, saved sessions;
- *HTML/CSS:* Built portfolio website from scratch;
- *Git, Git Bash, GitHub*: commands like pwd, cd, touch, mkdir, worked with local and remote repositories, commits, merging branches.

QA Automation (Basic Knowledge):

- *Python:* OOP, data types, loops, functions, error handling, logging;
- *Pytest framework:* Wrote test functions, parameterized, used fixtures;
- *Requests library:* Made HTTP calls;
- *Selenium WebDriver:* Located elements by XPath/CSS, performed actions (click, scroll, alerts, etc.);
- *Allure:* Used for test reporting;
- *Docker:* Created and managed images, containers;
- *Jenkins:* Worked with pipelines in CI/CD.

Experience

QA Engineer
Waverley Software | Nov 2021 - Aug 2023

- Performed functional/non-functional, regression, and smoke testing across all platforms, managed testing across DEV, STAGE, and PROD environments;
- Served as a feature owner: tested and clarified requirements, wrote user stories, created a checklist, and maintained documentation in Confluence;
- Performed manual testing of web and mobile (iOS & Android) applications;
- Used Android Studio and Xcode to install simulators, gather application logs, and reproduce issues on different OS versions;
- Verified app builds and updates in App Store and Google Play;
- Validated backend data using PostgreSQL by executing SQL queries such as SELECT, JOIN, and WHERE to ensure data accuracy and consistency across features;
- Performed GraphQL API validation using Postman by executing queries and mutations, inspecting responses;
- Used Chrome DevTools and Charles Proxy to inspect and debug UI, API traffic, and network behavior;
